This book will make a first contribution to identify the gaps in current practices and provide alternative mechanisms to conceptualize professionalism that is reflective of changing requirements, culture, and demographics of the contemporary military force. The military profession promotes the development, sustainment, and

embodiment of ethos, which guides conduct across operational contexts, from times of national and international crises and security challenges (e.g., war, natural disasters, and peace support operations). It is imperative for military leaders to understand how ethos and doctrine shape professional frameworks, which guide the conduct of military members.

From one of the most brilliant and influential lawyers of our time comes an unforgettable true story about the redeeming potential of mercy. Bryan Stevenson was a gifted young attorney when he founded the Equal Justice Initiative, a legal practice dedicated to defending the poor, the wrongly condemned, and

those trapped in the furthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man sentenced to die for a notorious murder he didn't commit. The case drew Stevenson into a tangle of conspiracy, political machination, and legal brinkmanship - and transformed his understanding of mercy and justice forever.--Back cover.
