With all the parenting information out there and the constant pressure to be the “perfect” parent, it seems as if many parents have lost track of one very important piece of the parenting puzzle: raising happy kids. Parenting today has gotten far too complicated. It’s never been the easiest job in the world, but with all the “parenting advice” parents are met with at every corner, it’s hard not to become bewildered. It seems that in the past it was a

good deal simpler. You made sure there was dinner on the table and the kids got to school on time and no one set anything on fire, and you called it a success. But today everybody has a different method for dealing with the madness--attachment parenting, free-range parenting, mindful parenting. And who is to say one is more right or better than another? How do you choose? The truth is that whatever drumbeat you march to, all parents would agree that we just want our kids to be happy. It seems like a no-brainer, right? But in the face of all the many parenting theories out there, happiness feels like it has become incidental. That’s where The Happy Kid Handbook

by child and adolescent psychotherapist and parenting expert Katie Hurley comes in. She shows parents how happiness is the key to raising confident, capable children. It's not about giving in every time your child wants something so they won't feel bad when you say no, or making sure that they're taking that art class, and the ballet class, and the soccer class (to help with their creativity and their coordination and all that excess energy). Happiness is about parenting the individual, because not every child is the same, and not every child will respond to parenting the same way. By exploring the differences among introverts, extroverts,

and everything in between, this definitive guide to parenting offers parents the specific strategies they need to meet their child exactly where he or she needs to be met from a social-emotional perspective. A back-to-basics guide to parenting, *The Happy Kid Handbook* is a must-have for any parent hoping to be the best parent they can be.

Disabilities affect

individuals from all walks of life - from the CEO at the largest fortune 500 company to the small business owner at the corner grocery store; from the pastor at the biggest church to the custodian at the local elementary school; from famous celebrities from all walks of life to small-town military heroes. Dr. Crawford G. Clark and his wife have endured a daily struggle raising two children with disabilities. He knows that parents in a similar situation suffer in silence, doing their best to survive each day. Many people have no clue what challenges they face. In this book, the author leads you on a journey of what it's like to raise children with disabilities, including

the difficulties with people not being very sympathetic toward children or parents. He covers subjects such as isolation, identity, idiosyncrasies, education, discipline, community, and how God views disabilities. In addition, he shares the story of Theodore DeShields, a good friend whose story speaks to all of us. While he was never supposed to be born, he became a strong person of faith who blessed all those around him.
