"In Degas' work there are a number of fundamental elements which exist across oeuvre and motif, technique and chronology. It is with these elements that Degas' Method is concerned: that which catches one's attention if the customary pigeonholing of the works is abandoned and the works themselves are returned to the creative ferment from which they emerged, where they exist side by side -- and from whence Degas, in a manner entirely his own, has taken and combined them. Degas' Method mixes painting, pastel, monotype, sculpture, drawing and several graphic disciplines in the desire to bring together

the artist's production, ranging across motif, technique and chronology." -- Ny Carlsberg Glyptotek website.

John Pawson's career as an architect and designer spans a variety of sizes and programs: from bowls to bridges, and monasteries to Calvin

Klein stores. In addition to his acclaimed design work, he is the author of Phaidon's successful *Minimum*, a book that paired images and captions to illustrate the notion of simplicity in a beautiful and inspirational manner. *Visual Inventory* presents some of the images from Pawson's personal collection of over 200,000 digital snapshots. The book opens with an essay explaining the importance of photography as a tool for Pawson's work, and the images are set one per page with illuminating captions. Covering a huge range of subjects, the photographs form a remarkable body of reference material. Some of the images illustrate a particular idea out form, material or space; others reflect the author's interest in returning repeatedly to certain subjects, capturing the changes brought by different weather, light conditions, seasons and patterns of use. Each image has been chosen for the book because it is useful, offering a lesson in visual thinking. None of the photographs in the book have been cropped or altered; it is the selection, arrangement and captioning of the

images that make this book unique, valuable and attractive to any architect, designer, artist or student who wants to see the world around them with a stronger eye. Degas' Method e-artnow Each spread in this board book is actually something else entirely -- from a flip phone and a folded t-shirt to an elephant's trunk and much more.

How Old Am I? Phaidon

This is the first comprehensive guide to today's most important, yet least understood transnational ideology -- political Islamism. The movement takes many forms, ranging from electoral participation to revolutionary terrorism and global jihad, and influences the politics of virtually every country around the globe. The guide examines the movement's diverse groups, ideas, and activities, including the beliefs, organizational structures, and interactions of the different groups. It focuses on thinkers and ideologies, movements and parties, and responding government policies and repression. The guide begins with two general essays. The first is an overview of contemporary Islamism that assesses its roots in the history of Islam and traces the rise of Islamist thought through the twentieth century to contemporary times. The

second essay addresses the concept of global jihad and jihadist movements, especially in relationship to terrorism, and provides background to the various groups and movements discussed in the book.

Following these introductions, sections are organized geographically and cover the areas of intense, and known, Islamist activity -- Sub-Saharan Africa, Asia, Australia and the Pacific, Central Asia, North Africa and the Middle East, Europe, and the Western Hemisphere. Essays within the sections examine specific countries and regions, and detail the groups and activities within these areas. The essays include detailed bibliographic information for further research.

The incredible life story of one of the 20th century's most important designers, who knew everyone from Hemingway to Picasso.

Ettore Sottsass and the Poetry of Things

chronicles the life and times of one of the most important, prolific, and, above all, interesting designers and architects of the 20th century.

Sottsass (1917-2007), originally trained as an architect and worked as a design consultant for Olivetti, where he developed the iconic Valentine typewriter, before going on to found the Memphis Group in the 1980s, ushering in an era of influential designs in furniture, ceramics and lighting that continue to inspire design minds today with their flamboyance and use of color. Author Deyan Sudjic (Director of London's Design Museum) does not

limit his narrative to an examination of Sottsass' iconic designs. Though a native son of Italy, Sottsass cast a shadow of influence on the entire world, traveling extensively over the course of his life and interacting with some of the 20th century's most iconic figures, including Picasso, Hemingway and Allen Ginsberg. Sudjic's writing, complemented by unpublished personal photographs from Sottsass' archive, offers a unique view of Sottsass from the perspective of the world that surrounded him, recounting anecdotes of encounters between the designer and his famous contemporaries. The result is a unique and comprehensive portrait not only Sottsass but of the last 100 years of design in Italy and around the world. Features anecdotes of his encounters with the biggest creatives of the time, and details of his influences and inspirations, documenting the contemporary design scene both in Italy and abroad.
