Assessment of Options for Extending the Life of the Hubble Space Telescope

BRYCEN AUGUSTUS

Consumer Reports

1999 Buying Guide

Univ of California Press
The Hubble Space Telescope (HST) has operated continuously since 1990. During that time, four space shuttle-based service missions were launched, three of which added major observational capabilities. A fifth "SM-4" was intended to replace key telescope systems and install two new instruments. The loss of the space shuttle Columbia, however, resulted in a decision by NASA not to pursue the SM-4 mission leading to a likely end of Hubble's useful life in 2007-2008. This situation resulted in an unprecedented outcry from scientists and the public. As a result, NASA began to explore and develop a robotic servicing mission; and Congress directed NASA to request a study from the National Research Council (NRC) of the robotic and shuttle servicing options for extending the life of Hubble. This report presents an assessment of those two options. It provides an examination of the contributions made by Hubble and those likely

as the result of a servicing mission, and a comparative analysis of the potential risk of the two options for servicing Hubble. The study concludes that the Shuttle option would be the most effective one for prolonging Hubble's productive life.

The Whole Body Reset

Image Comics
Few cars in modern times have caused as much of a stir as the turbocharged Subaru Impreza. It came from nowhere at the start of the 1990s to claim three successive World Rally Championships for its makers in the middle of that decade, and went on to become an enthusiasts' car thanks to its affordability, high performance - and, of course, the glorious exhaust note of its unusual flat-four 'boxer' engine. This book examines the three generations of Subaru Impreza WRX and WRX STI from 1992 - 2012, including how the roadgoing cars were developed from the successful rally models, production history and specification details. Topics covered include: History of the Impreza, and early days in competition with the Leone and the Legacy

models. Construction and derivatives of the distinctive flat-four engine. Innovations in the Impreza's four-wheel-drive system. Design and specifications for special editions. Includes material from Prodrive on their limited edition models. Examines both rally and roadgoing cars.

Springer
This revised and expanded edition of a bestselling text incorporates the latest developments in social research. Additions to each chapter do further justice to ideas on the research process in general and aspects of its practice in particular. Chapter summaries, questions for reflection and signposts to further reading are incorporated into a new textbook format. The aim of the book, however, remains the same: to bridge the gap between theory and

methods in social research, each of which is essential to understanding the dynamics of social relations. The style remains clear and accessible and the basic structure, similar. This book will have wide appeals as an introduction for undergraduates studying the methods and techniques of social science, as well as for postgraduate courses in research methods. In addition, it will enable those practising and teaching social research to stay abreast of key developments in the field.

The Car Hacker's

Handbook Dundurn
Enough about the oil problem. Here's the solution. Over a few decades, starting now, a vibrant US economy (then others) can completely phase out oil. This will save a net \$70 billion a year, revitalize key industries and rural America, create a million jobs, and enhance security. Here's the roadmap ? independent, peer-reviewed, co-sponsored by the Pentagon ? for the transition beyond oil, led by business and profit.

Sport Aviation John Wiley & Sons

"Carlos Villa has been

described as the preeminent Filipino American artist--a legend in artistic circles for his groundbreaking approaches and his influence on countless artists--but he remains little known to many fans and scholars of modern and contemporary art. Carlos Villa: Worlds in Collision is the first museum retrospective of his work, presented at the San Francisco Art Institute and the Asian Art Museum of San Francisco. Villa was trained at the San Francisco Art Institute in the 1950s as an abstract expressionist, and over time he transformed his practice to address issues of ethnic and cultural diversity. He concurrently assumed a leadership role in 'Third World' and 'multicultural' international art movements, and his large-scale works reference non-Western traditions, including tattoo, scarification, ritual, and ceremony. He was also an important theorist, curator, and organizer of public forums that he called 'actions.' This book traces the arc of his career from 1969 until his death in 2013, with emphasis on his feathered works from the 1970s, as well as later works that

address aspects of the history of Filipinos in the United States. It illuminates the social and cultural roots--and global importance--of Villa's art and teaching career as he sought to forge a new kind of art-world inclusion that reflected his own experience, commitment to diversity, and boundary-bending imagination"--

Autocar Beacon Press

This anthology examines paratexts that gaming cultures have produced as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur?

A Passion for Ideas John Wiley & Sons

In today's uncertain economy, more car buyers are turning to the used car market. Based on the results of unbiased tests and surveys conducted by Consumer Reports, the guide evaluates fuel economy, performance level, repair record, and overall quality of hundreds of 1984-1989 cars, with detailed reports on 1987-1989 models. Ratings charts, tables,

index.

Paratextualizing Games

National Academies Press

Targeting advanced students of astronomy and physics, as well as astronomers and physicists contemplating research on supernovae or related fields, David Branch and J. Craig Wheeler offer a modern account of the nature, causes and consequences of supernovae, as well as of issues that remain to be resolved. Owing especially to (1) the appearance of supernova 1987A in the nearby Large Magellanic Cloud, (2) the spectacularly successful use of supernovae as distance indicators for cosmology, (3) the association of some supernovae with the enigmatic cosmic gamma-ray bursts, and (4) the discovery of a class of superluminous supernovae, the pace of supernova research has been increasing sharply. This monograph serves as a broad survey of modern supernova research and a guide to the current literature. The book's emphasis is on the explosive phases of supernovae. Part 1 is devoted to a survey of the kinds of observations that inform us about supernovae, some basic

interpretations of such data, and an overview of the evolution of stars that brings them to an explosive endpoint. Part 2 goes into more detail on core-collapse and superluminous events: which kinds of stars produce them, and how do they do it? Part 3 is concerned with the stellar progenitors and explosion mechanisms of thermonuclear (Type Ia) supernovae. Part 4 is about consequences of supernovae and some applications to astrophysics and cosmology. References are provided in sufficient number to help the reader enter the literature.

The Handy Astronomy Answer Book Springer
Science & Business Media
Ultraviolet Astronomy and the Quest for the Origin of Life addresses the use of astronomical observations in the ultraviolet range to better understand the generation of complex, life-precursor molecules. The origin of RNA is still under debate but seems to be related to the generation of pools of complex organic molecules submitted to heavy cycles of solution in water and drying. This book investigates whether these cycles require a planetary surface or may

occur in space by examining both the theoretical and observational aspects of the role of UV radiation in the origin of life. This book offers the latest advances in these studies for astronomers, astrobiologists and planetary scientists. Addresses both the theoretical and observational aspects of the role of Ultraviolet (UV) radiation in the origin of life Builds on the requirements to produce prebiotic molecules in space and the implications for the origin of RNA Investigates the use of ultraviolet observations related to planetary system formation, the evolution of young planetary disks, and the interaction of stars with planetary atmospheres

Chagall Springer Science & Business Media
A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's

westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Automobile Design Liability Que Publishing
This volume reviews the current status with respect to both theory and observation of the extragalactic distance scale. A sufficient accuracy is required both for a precise determination of the cosmological parameters and also in order to achieve a better understanding of physical processes in extragalactic systems. The "standard

candles", used to set up the extragalactic distance scale, reviewed in this book include cepheid variables, RR Lyrae variables, novae, Type Ia and Type II supernovae as well as globular clusters and planetary nebulae.

'GRIDLOCK,' Part One
22,000 MILES UP, THERE IS (STILL) NO BACKUP. They call it Gridlocking--maglev-bike races across the Fuse's vast solar arrays. Fast, dangerous, and very illegal. When a gridlocker turns up dead, Klem and Ralph begin their own race to catch a killer! PLUS: Bonus backup strip 'TABLOID' starts this issue!

Consumer Reports Indiana Historical Society
Since the mid-1990s, the emergence of a hydrogen economy and the speed with which it will arrive have been vigorously debated. As a disruptive technology, dominant designs for the production, storage and distribution of hydrogen have not yet been established. Neither have performance characteristics been

achieved to compete with the existing combustion engine, though the efficiency and durability of hydrogen fuel cells are improving. This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development policies on national energy, environment and transport sector.--

From cars to cell phones to washing machines, this book presents the most objective information available to the American consumer. Ratings, charts, & indices.

How to Tune and Modify Your Camaro, 1982-1998 W G Nichols Pub

A revised new edition of the bestselling toolkit for creating, building, and maintaining a strong brand From research and analysis through brand strategy, design development through application design, and identity standards through launch and governance, Designing Brand Identity, Fourth

Edition offers brand managers, marketers, and designers a proven, universal five-phase process for creating and implementing effective brand identity. Enriched by new case studies showcasing successful world-class brands, this Fourth Edition brings readers up to date with a detailed look at the latest trends in branding, including social networks, mobile devices, global markets, apps, video, and virtual brands. Features more than 30 all-new case studies showing best practices and world-class Updated to include more than 35 percent new material Offers a proven, universal five-phase process and methodology for creating and implementing effective brand identity

Making Choices about Hydrogen IDRC

Step-by-step instructions with callouts to HTC EVOTM 3D photos that show you exactly what to do Help when you run into problems or limitations with your HTC EVO 3D Tips and Notes to help you get the most from your HTC EVO 3D, the Android OS, and the 4G

service Full-color, step-by-step tasks walk you through getting and keeping your HTC EVOTM 3D working just the way you want. Learn how to: • Quickly get comfortable with EVO 3D, glasses-free 3D, and the Android OS • Customize your EVO 3D's hardware and software • Play music and videos, and sync media with your computer • Capture stunning 3D and 2D photos and video • Connect to Bluetooth, Wi-Fi, and secure VPNs • Communicate, manage, and synchronize contacts and appointments • Capture, store, view, and share photos with both EVO 3D cameras • Set up and maximize Gmail, POP3, and IMAP email accounts • Optimize your web browsing experience • Configure the phone application and Google Voice • Efficiently manage all your calls, contacts, and messages • Video chat with EVO 3D's front-facing camera • Find, choose, install, and work with new Android apps • Squeeze out more hours of battery life • Properly maintain and troubleshoot your EVO 3D • Keep your HTC EVO 3D up-to-date and running smoothly
