The Sun, the Earth, and Near-earth Space Penguin

I Wonder Why the Wind Blows answers all sorts of tricky and fascinating questions about Planet Earth, such as "How cold is snow?", "How hot are deserts?", and "Where do rivers end?"

I Wonder About Allah I Wonder Why

Why does poetry continue to exist? It does not deliver information to solve problems or assist in helping with problems. Facts have no usefulness for rhyming couplets. We live our lives in comfort when we solve tangible problems effectively. Facts usually have some built into it reward system. That is, until we seek a closer communion with ourselves living in a world made to be separate from us. It is a world where not seeking of competitive advantages, that emotional world within, leads to being struck by some indefinable satisfaction to be trusted. It brings approval for the arts in their many forms. For me, the most beautiful of them is poetry, making words, when read, into sounds equal to the power of singing by using much the same rhythmic repeats but to be accomplished without need of voice or ears and to be more easily remembered ever after throughout a lifetime with the same emotional impact, and, sometimes more so as deeper understanding evolves with time.

Klara and the Sun I Wonder Why

Winner of the 2019 Whirling Prize "Strong on science but just this side of poetry." —Nature A beautifully illustrated exploration of the principles, laws, and wonders that rule our universe, our world, and our daily lives, from the New York Times bestselling creator of *Lost in Translation* Have you ever found yourself wondering what we might have in common with stars, or why the Moon never leaves us? Thinking about the precise dancing of planets, the passing of time, or the nature of natural things? Our world is full of unshakable mystery, and although we live in a

civilization more complicated than ever, there is simplicity and reassurance to be found in knowing how and why. From the New York Times bestselling creator of *Lost in Translation*, *Eating the Sun* is a delicately existential, beautifully illustrated, and welcoming exploration of the universe—one that examines and marvels at the astonishing principles, laws, and phenomena that we exist alongside, that we sit within. "[A] lyrical and luminous celebration of science and our consanguinity with the universe. . . . Playful and poignant." —Brain Pickings

Chasing the Sun Kingfisher

With many firsts to experience and lots to see, a little one's life is full of wonder and discovery.

I Wonder Why the Sun Rises Simon and Schuster

In *I Wonder as I Wander*, Langston Hughes vividly recalls the most dramatic and intimate moments of his life in the turbulent 1930s. His wanderlust leads him to Cuba, Haiti, Russia, Soviet Central Asia, Japan, Spain (during its Civil War), through dictatorships, wars, revolutions. He meets and brings to life the famous and the humble, from Arthur Koestler to Emma, the Black Mammy of Moscow. It is the continuously amusing, wise revelation of an American writer journeying around the often strange and always exciting world he loves.

I Wonder Why the Wind Blows Hill and Wang

Sting's evocative lyrics from "King of Pain" are powerfully transformed into minimalistic illustrations by Sven Völker, who gives voice to his son's journey from illness to health in this extraordinary and deeply moving collaboration that explores pain's sadness, beauty, and wonder.

I Wonder About Allah 1 Simon and Schuster

Originally published: New York: Kingfisher, 1997.

Why the Sun and the Moon Live in the Sky Simon and Schuster

The second book in the series that answers some of the cunning questions children ask about God (Allah).

I'll Give You the Sun Houghton Mifflin Harcourt

For readers of *Bad Blood* and *Empire of Pain*, an authoritative look at monopoly medicine from the dawn of patents through the race for COVID-19 vaccines and how the privatization of public science has prioritized profits over people *Owning the Sun* tells the story of one of the most contentious fights in human history: the legal right to produce lifesaving medicines. Medical science began as a discipline geared toward the betterment of all human life, but the merging of research with intellectual property and the rise of the pharmaceutical industry warped and eventually undermined its ethical foundations. Since World War II, federally funded research has facilitated most major medical breakthroughs, yet these drugs are often wholly controlled by price-gouging corporations with growing international ambitions. Why does the U.S. government fund the development of medical science in the name of the public only to relinquish exclusive rights to drug companies, and how does such a system impoverish us, weaken our responses to crises, and, as in the cases of AIDS and COVID-19, put the world at risk? Outlining how generations of public health and science advocates have attempted to hold the line against Big Pharma and their allies in government, Alexander Zaitchik's first-of-its-kind history documents the rise of privatized medicine in the United States and its subsequent globalization. From the controversial arrival of patent-wielding German drug firms in the late nineteenth century to present-day coordination between industry and philanthropic organizations—including the influential Bill & Melinda Gates Foundation—that stymie international efforts to vaccinate the world against COVID-19,

Owning the Sun tells one of the most important and least understood histories of our time.

The Setting Sun Macmillan

The perfect introduction to polar lands, featuring grumpy bears, record-breaking birds, polar pioneers and much more. Our Sun Bloomsbury Publishing USA

Kingfisher's trusted question-and-answer series has a brand-new look for a new generation.

After the Sun Sets Kingfisher

The #1 New York Times bestseller and National Book Award Finalist from the bestselling author of Everything, Everything will

have you falling in love with Natasha and Daniel as they fall in love with each other. Natasha: I'm a girl who believes in science and facts. Not fate. Not destiny. Or dreams that will never come true. I'm definitely not the kind of girl who meets a cute boy on a crowded New York City street and falls in love with him. Not when my family is twelve hours away from being deported to Jamaica. Falling in love with him won't be my story. Daniel: I've always been the good son, the good student, living up to my parents' high expectations. Never the poet. Or the dreamer. But when I see her, I forget about all that. Something about Natasha makes me think that fate has something much more extraordinary in store—for both of us. The Universe: Every moment in our lives has brought us to this single moment. A million futures lie before us. Which one will come true? *** "Beautifully crafted."--People Magazine "A book that is very much about the many factors that affect falling in love, as much as it is about the very act itself . . . fans of Yoon's first novel, Everything Everything, will find much to love—if not, more—in what is easily an even stronger follow up." —Entertainment Weekly "Transcends the limits of YA as a human story about falling in love and seeking out our futures." —POPSUGAR.com
