Moto Hagio has been reinventing Shoji manga (Japanese comics marketed at teenage girls) since 1969. Unconstrained by boundaries of genre, she has sculpted a career characterised by intellectual curiosity, psychological authenticity and an aesthetic sense that has often been at odds with a Shoji manga mainstream littered with Sailor Moon knockoffs and sub-Mills and Boon romance cliches. Now, for the first time in English, Fantagraphics offers a selection of Hagio short stories spanning four decades of groundbreaking work by an artist at the peak of her powers.

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets?- Are restricted from traveling outside their villages?- Have no legal right to own land or property?- Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings?- Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan?- Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their

problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

The unknown painters of the small town of Otsu, Japan, created a painting genre versatile enough to survive for more than three centuries and appealing enough to enter into literature, theater, dance, song, and the work of mainstream artists. Gods and Goblins presents Otsu-e as a tradition that has continually reinvented itself in response to social changes and is still alive today. In the early 17th century artists in Otsu began producing inexpensive paintings to sell as souvenirs to travelers who passed through the town on the great highway known as the Tokaido, or Eastern Sea Route, which linked Kyoto and Edo (now Tokyo). These folk paintings depict gods, humans, animals, and supernatural beings in humorous and often satirical situations, and are characterized by lively, spontaneous brushstrokes and an unsophisticated charm and humor.

Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.

A classic of Japanese speculative fiction that blurs the line between consumption and creation when a cyborg assumes the form and spirit of a murdered child Until he escaped, he had been called "Sample B #3," but he had never liked this name. That would surprise them—that he could feel one way or another about it. He was designed to reshape himself based on whatever life forms he ingested; he was not made to think, and certainly not to assume the shape of a repair technician whose cells he had sampled and then simply walk out of the secure compound. Artificial Intelligence is all too real in this classic of Japanese science fiction by Mariko Ōhara. Jonah, a child murdered by her mother, has become the spirit of an AI-controlled house where the rogue cyborg once known as Sample B #3 takes refuge and, making a meal of the dead girl buried under the house, takes Jonah's form. On faraway Planet Caritas, an outpost of human civilization, the female AI system that governs society has become insane. Meanwhile, the threat of the Adiaptron Empire, the machine race that #3 was built to fight, remains. With the familiar strangeness of a fairy tale, Ōhara's novel traverses the mysterious distance between body and mind, between the mechanics of life and the ghost in the machine, between the infinitesimal and infinity. The child as mother, the mother as monster, the monster as hero: this shape-shifting story of nourishment, nurture, and parturition is a rare feminist work of speculative fiction and received the prestigious Seiun (Nebula) Award in 1991. Hybrid Child is the first English translation of a major work of science fiction by a female Japanese author.

This volume explores Confucian views regarding the human body, health, virtue, suffering, suicide, euthanasia, 'human drugs,' human experimentation, and justice in health care distribution. These views are rooted in Confucian metaphysical, cosmological, and moral convictions, which stand in contrast to modern Western liberal perspectives in a number of important ways. In the contemporary world, a wide variety of different moral traditions flourish; there is real moral diversity. Given this circumstance, difficult and even painful ethical conflicts often occur between the East and the West with regard to the issues of life, birth, reproduction, and death. The essays in this volume analyze the ways in which Confucian bioethics can clarify important moral concepts, provide arguments, and offer ethical guidance. The volume should be of interest to both general readers coming afresh to the study of bioethics, ethics, and Confucianism, as well as for philosophers, ethicists, and other scholars already familiar with the subject.
