In this book, the author draws from finance, psychology, economics, and other disciplines in business and the social sciences, recognising that personal finance and investments are subjects of study in their own right rather than merely branches of another discipline. Considerable attention is given to topics which are either ignored or given very little attention in other texts.

These include: the psychology of investment decision-making stock market bubbles and crashes property investment the use of derivatives in investment management regulation of investments business. More traditional subject areas are also thoroughly covered, including: investment analysis

portfolio management
capital market theory
market efficiency
international investing
bond markets institutional
investments option
pricing macroeconomics
the interpretation of
company accounts.
Packed with over one hundred exercises, examples and exhibits and a helpful glossary of key terms, this book helps readers grasp the relevant principles of money management. It avoids non-essential mathematics and provides a novel new approach to the study of personal finance and investments. This book will be essential for students and researchers engaged with personal finance, investments, behavioural finance, financial derivatives and financial economics. This book also comes with a supporting website that includes two updated chapters, a new article featuring a behavioural model of the dot com, further exercises, a full glossary and a regularly updated blog from the author.

Is your firm's board

creating value—or destroying it? Change is coming. Leadership at the top is being redefined as boards take a more active role in decisions that once belonged solely to the CEO. But for all the advantages of increased board engagement, it can create debilitating questions of authority and dangerous meddling in day-to-day operations. Directors need a new road map—for when to lead, when to partner, and when to stay out of the way. Boardroom veterans Ram Charan, Dennis Carey, and Michael Useem advocate this new governance model—a sharp departure from what has been demanded by governance activists, raters, and regulators—and reveal the emerging practices that are defining shared leadership of directors and executives. Based on personal interviews and the authors' broad and deep experience working with executives and directors from dozens of the world's largest firms, including Apple, Boeing, Ford, Infosys, and Lenovo, *Boards That Lead* tells the inside story behind the successes and pitfalls of this new leadership model

and explains how to:

- Define the central idea of the company
- Ensure that the right CEO is in place and potential successors are identified
- Recruit directors who add value
- Root out board dysfunction
- Select a board leader who deftly bridges the divide between management and the board
- Set a high bar on ethics and risk

With a total of eighteen checklists that will transform board directors from monitors to leaders, Charan, Carey, and Useem provide a smart and practical guide for businesspeople everywhere—whether they occupy the boardroom or the C-suite.

Auditing: An International Approach (formerly titled *Auditing and Other Assurance Engagements*) presents a comprehensive, balanced, and current introduction to the auditing field. This text bridges the gap between students' knowledge of accounting principles and the professional practice of accounting and auditing in the working world. Emphasizing a 'cycles' approach, the book covers the financial auditor's decision-making process: 1) problem

recognition and developing audit objectives, 2) evidence collection with audit procedures, and 3) making judgements about control risk and the fair presentation of financial statement assertions. Building on the strengths of the first Canadian and former U.S. editions, the authors reflect exciting challenges inherent to current auditing practice and other assurance services. As the revised title suggests, the second edition of this best-selling text has kept pace with the growing importance of International Accounting Standards in the context of Canadian business world.

If you've ever bought a personal finance book, watched a TV show about stock picking, listened to a radio show about getting out of debt, or attended a seminar to help you plan for your retirement, you've probably heard some version of these quotes:

"What's keeping you from being rich? In most cases, it is simply a lack of belief." —SUZE ORMAN, *The Courage to Be Rich*

"Are you latte-ing away your financial future?"

—DAVID BACH, *Smart Women Finish Rich* "I know you're capable of picking winning stocks and holding on to them."

—JIM CRAMER, *Mad Money* They're common refrains among personal finance gurus. There's just one problem: those and many similar statements are false. For the past few decades, Americans have spent billions of dollars on personal finance products. As salaries have stagnated and companies have cut back on benefits, we've taken matters into our own hands, embracing the can-do attitude that if we're smart enough, we can overcome even daunting

financial obstacles. But that's not true. In this meticulously reported and shocking book, journalist and former financial columnist Helaine Olen goes behind the curtain of the personal finance industry to expose the myths, contradictions, and outright lies it has perpetuated. She shows how an industry that started as a response to the Great Depression morphed into a behemoth that thrives by selling us products and services that offer little if any help. Olen calls out some of the biggest names in the business, revealing how even the most respected gurus have engaged in dubious, even deceitful, practices—from accepting payments from banks and corporations in exchange for promoting certain products to blaming the victims of economic catastrophe for their own financial misfortune. *Pound Foolish* also disproves many myths about spending and saving, including: Small pleasures can bankrupt you: Gurus popularized the idea that cutting out lattes and other small expenditures could make us millionaires. But reducing our caffeine consumption will not offset our biggest

expenses: housing, education, health care, and retirement. Disciplined investing will make you rich: Gurus also love to show how steady investing can turn modest savings into a huge nest egg at retirement. But these calculations assume a healthy market and a lifetime without any setbacks—two conditions that have no connection to the real world. Women need extra help managing money: Product pushers often target women, whose alleged financial ignorance supposedly leaves them especially at risk. In reality, women and men are both terrible at handling finances. Financial literacy classes will prevent future economic crises: Experts like to claim mandatory sessions on personal finance in school will cure many of our money ills. Not only is there little evidence this is true, the entire movement is largely funded and promoted by the financial services sector. Weaving together original reporting, interviews with experts, and studies from disciplines ranging from behavioral economics to retirement planning, *Pound Foolish* is a compassionate and compelling book that will

change the way we think and talk about our money. *Wiley CPA Exam Review 2012* American Animal Hosp Assoc
