258 Clinical Cases in Medicine Jaypee Brothers Medical Publishers
Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

RSSDI Diabetes Update 2019 Springer Nature

The book offers a comprehensive and up-to-date guide to the cutting edge arthroscopic transosseous techniques for the treatment of rotator cuff tears, which are gradually taking over from the common open surgical approach, defined as the gold standard for RCR. With the help of numerous figures, it presents step by step a novel all-arthroscopic anchorless transosseous suture technique that is less invasive and easier to perform. After discussing the etiopathogenesis, histopathology and radiological classification of rotator cuff tears, the book reviews all possible arthroscopic procedures and explores in detail suture management, describing single and double tunnel options. It also examines the complications and post-operative rehabilitation and imaging, while the closing chapter addresses the economic aspects of daily use. Intended primarily for arthroscopic surgeons interested in the field of shoulder joint repair, this exhaustive guide is also a valuable resource for residents and shoulder specialists.

Competition Science Vision Blue Rose Publishers

This open access book takes a multidisciplinary approach to provide a holistic understanding of late old age, and situates the aged person within the context of family, caregivers, clinical and other institutions. All through the book, the author discusses preparedness for an aging individual as well as the society in the Indian context. The book highlights inevitable but mostly

neglected health issues like depression, dementia, fall, and frailty and provides detailed analyses of solutions that are practicable in low resource settings. It also brings up intergenerational differences and harmony in the context of holistic care of older Indians. Alongside clinical perspectives, the book uses narratives of elderly patients to dwell on the myriad of problems and issues that constitute old age healthcare. Demonstrating cases that range from the most influential to the most underprivileged elderly in India, the book enlightens multiple caregivers—doctors, nurses, and professional caregivers as well as family members—about the dynamic approach required in dealing with complex issues related to late old age. The narratives make the book relatable and interesting to non-academic readers, with important lessons for gerontological and geriatric caregiving. It is also of use to older adults in preparing for active aging.

Review of AIIMS Rudra Publication

The theme revolves around two characters Shreyas and Shruti. The story of love at first sight and at one stage they were at verge of marrying. But the father of the girl opts for a better son-in-law and decides to marry his daughter to the boy of his choice. Shreyas has foreseen such a corollary of his love affair, is ready to reconcile but his agony is exacerbated by the insistent demand of Shruti that he must come to attend her marriage party and extend his wishes and blessings to her. He accepts the invitation but realizes that it was never an easy task to be present at one's sweetheart's marriage.

AIIMS Annual Report Pearson Education India

The current practice of medicine is largely moving toward applying an evidence-based approach. Evidence-based medicine is the integration of best research evidence using systematic reviews of the medical literature and then translating it into practice by selecting treatment options for specific cases based on the best research. Clinicians rely on the availability of evidence and accordingly take decisions to provide best treatment to their patients. Clinical management of neurologically compromised patients is challenging and varied; for this reason, treating physicians including neuroanesthesiologists are always in search of best available evidence for patient management and care.

Essentials of Evidence-Based Practice of Neuroanesthesia and Neurocritical Care highlights the various controversies that exist in the practice of neuroanesthesia and provides conclusive evidence-based solutions. This comprehensive resource succinctly discusses evidence-based practice of neuroanesthesia based on systematic reviews in clinical neuroscience research. Topics include neurophysiology: ICP or CPP thresholds; neuropharmacology: intravenous or inhalational anesthetics; and neuromonitoring: ICP monitoring. Evidence-based practice is now an integral part of neuroscience, and this book will help residents and trainees gain knowledge to apply it to their practice.

Endorsements/Reviews: "Evidence based practice is facilitating changes at a rapid pace in neuroanesthesia and neurocritical care practice. Its practice is exceedingly crucial in neuroanesthesia and neurocritical care considering the criticality of the neurologically sick patients, which leaves little or no room for error for an acceptable outcome in them. Patient management in Neuroanesthesia and neurocritical care has many contentious issues because of rapidly evolving changes in their management which require treatment guided by the latest available evidence in literature. Dr. Hemanshu Prabhakar is a strong proponent of evidence based practice for the management of neurologically ill patients both for surgical procedures and their management in neurointensive care unit. Undoubtedly, this book will be of enormous benefits to the students as well as teachers of neuroanesthesia and neurocritical care sub-specialties." -- Parmod Bithal, Editor-In-Chief, Journal of Neuroanaesthesiology and Critical Care (JNACC) Highlights the various controversies that exist in the practice of neuroanesthesia and provides conclusive evidence-based solutions Topics include neurophysiology: ICP or CPP thresholds; neuropharmacology: intravenous or inhalational anesthetics; and neuromonitoring: ICP monitoring Provides residents and trainees with the knowledge to apply evidence-based practice of neuroanesthesia to their practice

Final Edge Jaypee Brothers, Medical Publishers Pvt. Limited This book shows students how international business differs from local or national business, and discusses the fundamental challenges and emerging trends in international business. It looks at the impact of globalization, corporate social responsibility, and the ever expanding use of digital technology on corporate strategies and executive decisions. It provides students with a

broad overview of the subject, while guiding them through the practical issues and context of international business with the use of a range of examples, and cases and discussion questions drawn from around the world.

The Pearson Guide to GPAT And Other Competitive Examinations In Pharmacy: CBS Publishers & Distributors Pvt Limited, India Human culture has always weaved myths around its pattern of existence for multiple purposes. The interplay of religion and social practices have found their own space within the sphere of mythology. It is possible to read mythical texts to probe into the greater picture of human civilization. The contribution of myths towards the shaping of human beliefs, behavioural patterns are evident and assessing them often reveals a plethora of cultural histories unexplored and therefore unacknowledged before. The contribution of mythopoeia towards the construct of human socio-cultural identity has been largely accepted. Modern academia has thus taken a strong interest in revisionist literature to understand the hitherto unknown nuances of human civilization. In the edited anthology, *Art and Aesthetics of Modern Mythopoeia: Literatures, Myths and Revisionism (Vol-II)*, like the first volume, an attempt has been made to anthologize the works of a large number of authors who have talked about pertinent issues in the context of myth-making, the latent politics of mythopoeia and has taken into account several under-explored texts that are rich in mythical content. This volume offers a wide range of critical studies involving classical as well as modern myths around the globe.
