Contributions from international experts in both academia and business look at current theory and best practice in environmental TQM, education, training and communications. *Greening People* argues that, if a company is to adopt an environmentally-aware approach to its activities, the employees are the key to success or failure. Part 1 demonstrates the relationship between human resource management and environmental management. Part 2 provides insight into the psychological make-up of contemporary staff that may foster or hinder company-wide implementation of environmental measures, and Part 3 addresses the shortcomings of current management training programmes and suggests new approaches for effective implementation of environmental human resource management.
