This book takes the reader beyond net effects and main and interaction effects thinking and methods. Complexity theory includes the tenet that recipes are more important than ingredients—any one antecedent (X) condition is insufficient for a consistent outcome (Y) (e.g., success or failure) even though the presence of certain antecedents may be necessary. A second tenet: modeling contrarian cases is useful because a high or low score for any given antecedent condition (X) associates with a high Y, low Y, and is irrelevant for high/low Y in some recipes in the same data set. Third tenet: equifinality happens—several recipes indicate high/low outcomes.

Drawing from an international authorship and having global appeal, this book scrutinizes, suggests and aggravates the relationships, boundaries and connections between arts, research and education in various contexts. Building upon existing publications in the field of arts-based educational research, it deliberately connects and disconnects the terms in order to expose and broaden the scope of this field thereby encouraging fresh perspectives. This book portrays both contemporary theoretical prospects as well as contemporary examples of practice. It also presents work of emerging scholars, thereby 'growing the field'. The book includes academic text-based chapters, as well as poetry, narrative fiction, visual essays, and combinations of text-image-sound/video that demonstrate performance of music, theatre, exhibition and dance. This book provides and provokes critical dialogue about the forms, representations, dissemination and intersections of the arts, research and education. This is a focused collection and resource for scholars and students with an international authorship, perspective and audience.

Focusing on the integral role of the researcher, *Qualitative Research for the Social Sciences* uses a conversational writing style that draws readers into the excitement of the research process.

Lichtman offers a balanced and nuanced approach, covering the full range of qualitative methodologies and viewpoints about the field, including coverage of social media as a tool to facilitate research or as a venue for study. After presenting theoretical concepts and a historical overview, Lichtman guides readers, step by step, through the research process, addressing issues of analyzing data, presenting completed research, and evaluating research. Real-world examples from across the social sciences provide both practical and theoretical information, helping readers

understand abstract ideas and apply them to their own research.

The Association of Southeast Asian Institutions of Higher Learning (ASAIHL) has been playing an important role in educational development to promote innovative teaching, research and cooperation among institutions of higher learning. Build Bright University (BBU), Cambodia had organized the 2015 ASAIHL International Conference during 2-4 December at Siem Reap. The main theme of the conference was "Educational Access and Excellence". The conference covered three sub-themes, namely, (i) cross-border higher education in global context, (ii) excellence in education through provision of technology, effective teaching and research, and (iii) student learning outcomes. Delegates from France, UK, Japan, Singapore, Hong Kong, India, Thailand, Malaysia, Philippines, Vietnam, Taiwan, East Timor, Cambodia and others had participated in the conference.

Critical qualitative research informs social education through a lens that ensures the investigation of issues in education tied to power and privilege, ultimately leading to advocacy and activism. The concept of critical is increasingly challenged in this age of neoliberal reform; nevertheless, critical implies questioning, investigating and challenging in terms of equity and social justice, leading to critical consciousness (Freire, 1970). While we resist defining social education, as hopefully these ideas / concepts are fluid, the idea stems from a continual analysis and synthesis of critical theory/ critical pedagogy, media and cultural studies, social reconstruction / social justice, and social studies education framed by culturally responsive pedagogy. A social education take on critical qualitative research thus suggests multiple truths and perspectives and focuses on questions rather than answers. While many have written on qualitative educational research and some have attempted to integrate critical pedagogy and qualitative research, few have explored the specific idea of social education and critical qualitative research. A major issue is that social education claims that there are no set procedures, scripted approaches, or narrow definitions as to the possibilities of research endeavors. Social education researchers make the process and investigation their own and adapt questions, procedures, methods, and strategies throughout the experience. This reflects an ever changing criticality in the bricolage of the research (Steinberg, 2011). Critical qualitative research and social education are vital for the world of the 21st century. The onslaught of neoliberalism, corporatization, standardization, testing, and the continuing attack on public schools and educators necessitate critical approaches to teaching and learning along with critical qualitative research in social education. Ongoing issues with equity and social justice tied to race, ethnicity, class, orientation, age, and ability linking to schooling, education, teaching and learning must be addressed. The struggle between unbridled capitalism and democracy warrant these investigations in the 21st century, hopefully leading to advocacy and activism.

This textbook presents an integrative approach to thinking about research methods for social

justice. In today's education landscape, there is a growing interest in scholar-activism and ways of doing research that advances educational equity. This text provides a foundational overview of important theoretical and philosophical issues specific to this kind of work in Section I. In Section II, readers engage with various ways of thinking about, collecting, and analyzing data, including qualitative, quantitative, and mixed methods approaches. Finally, in Section III, through case studies and research narratives, readers will learn about real scholars and their work. This book takes a wide-ranging approach to ways that various modalities and practices of research can contribute to an equity mission.

Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Social research is a burgeoning field. Of course it has many traditions and approaches, but there is a high premium upon thinking differently and thinking anew because social life is never static or wholly predictable. The Handbook, edited by internationally recognized scholars, provides a comprehensive, pitch-perfect critical assessment of the field. The main features of the Handbook are: Clear organization into 4 parts dealing with The Social Context of Research; Design and Data Collection; Integrating The Analysis of New Data Types; Sampling, Inference and Measurement Clear, cutting edge chapters on Objectivity; Causation; Organizing Social Research; Correspondence Analysis; Grounded Theory; Conversational Surveys; Mixed Methods; Meta-Analysis; Optimal Matching Analysis; GIS Analysis; Quantitative Narrative Analysis; Longitudinal Studies; SEM; MLM; Qualitative Comparative Analysis; Respondent Driven Sampling Brings together a glittering assembly of the key figures working in the field of research methods Demonstrates the continuities and productive tensions between classical traditions and real world research. The result is a superbly organized text which will be required reading for anyone interested in the routes and future of social research. It is an unparalleled teaching resource and a 'must have' for serious social researchers.

Inquiry and Leadership: A Resource for the DNP Project Springer Nature

This book examines the process of conducting research on parental involvement in an effort to promote academic achievement across all school levels, income levels, and racial lines, theories, and research. Latunde explores the policies that have emerged to support the role of families and home-school collaboration in the education of youth, and evidence supporting home school collaboration and the need for parental involvement to improve student outcomes. She defines parental research and its role in our understanding of parental involvement and student outcomes and examines federal and state mandates for parental involvement and shares specific parental involvement resources. The nuances in parental involvement are critical to understanding the roles family play in the academic achievement youth, and how schools may partner with parents for success.

Coherente con la trascendencia de la investigación cualitativa en el ámbito académico, este libro presenta 7 métodos muy importantes que son aplicados de forma rigurosa en las diferentes disciplinas científicas, particularmente en la redacción de las tesis doctorales de antropología, ciencias sociales y administración. Estos métodos son: fenomenología, hermenéutica, etnometodología, etnografía, método de caso, y teoría fundamentada, los cuales vienen acompañados de ejemplos prácticos a situaciones concretas de producción de nuevos conocimientos. Los estudiantes de pregrado y postgrado encontrarán, asimismo, guías que les permitirán orientarse en los múltiples métodos cualitativos de investigación y utilizarlos en función del objeto de estudio o de los resultados que pretenden obtener de su descubrimiento en los distintos contextos sociales.

Книга продолжает разработку темы психологического знания, начатую в двух предыдущих выпусках, опубликованных издательством «Институт психологии РАН» в 2018 г. (Психологическое знание: современное состояние и перспективы развития) и в 2021 г. (Психологическое знание: виды, источники, пути построения). Авторы данного сборника рассматривают общую логику и стадии исследовательского процесса в психологии. В первом разделе проанализирована структура этого процесса, во втором рассмотрены его стадии, в третьем – его организация и разрабатываемые в настоящее время проблемы.
