A Treatise on the Particular Examen of Conscience Peterson's

This volume explores the essential relationship between spirituality and activism in conversation with a political theology of the cross. The author contends that contemplative practice and activism bear the same cruciform footprint and are integrally connected, for the cross of Jesus Christ reveals both the brokenness in our lives and the corresponding brokenness in the world; it also discloses the God who is always (and already) bringing resurrection and life out of the death-tending ways of our world. The cross and resurrection expose other crosses, large and small, that litter the landscape of our world and of our personal and corporate lives, as well as places where God's resurrecting power is at work, bringing life out of death and establishing footholds for the unfolding of the new creation. The volume engages Paul's Letter to the Galatians and new scholarly readings of it as a rich resource for reflection on these matters and explores the fruit of the Spirit as political virtues that empower communal participation in God's restorative work in the world. Providing new angles of vision on both the cross and the apostle Paul, the book expands and enlivens reflection on spirituality and activism as profound and generative resources for contemporary faith and practice.

This book is a collection of insightful and unique state-of-the-art papers presented at the Computing Conference which took place in London on June 22-23, 2023. A total of 539 papers were received out of which 193 were selected for presenting after double-blind peer-review. The book covers a wide range of scientific topics including IoT, Artificial Intelligence, Computing, Data Science, Networking, Data security and Privacy, etc. The conference was successful in reaping the advantages of both online and offline modes. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.
