'When an accident occurs, something may emerge of lasting value, for the human spirit may rise to its greatest heights. This happened on Haramosh.' The Last Blue Mountain is the heart-rending true story of the 1957 expedition to Mount Haramosh in the Karakoram range in Pakistan. With the summit beyond reach, four young climbers are about to return to camp. Their brief pause to enjoy the view and take photographs is interrupted by an avalanche which sweeps Bernard Jillott and John Emery hundreds of feet down the mountain into a snow basin. Miraculously, they both survive the fall. Rae Culbert and Tony Streather risk their own lives to rescue their friends, only to become stranded alongside them. The group's efforts to return to safety are increasingly desperate, hampered by injury, exhaustion and the loss of vital climbing gear. Against the odds, Jillott and Emery manage to climb out of the snow basin and head for camp, hoping to reach food, water and assistance in time to save themselves and their companions from an icy grave. But another cruel twist of fate awaits them. An acclaimed mountaineering classic in the same genre as Joe Simpson's *Touching the Void*, Ralph Barker's *The Last Blue Mountain* is an epic tale of friendship and fortitude in the face of tragedy.

In *Swim Speed Secrets*, 4-time Olympian, gold medalist, and triathlon world champion Sheila Taormina reveals the swim technique used by the world's fastest swimmers. Over the course of 4 Olympic Games and throughout her career as a world champion triathlete, Taormina refined her exceptional technique as a student of the sport, studying the world's best swimmers using underwater photographs and video analysis. From Johnny Weissmuller to Michael Phelps, the world's fastest swimmers share two common elements: high stroke rate and a high-elbow underwater pull. Many swimmers and triathletes neglect the underwater pull, distracted by stroke count or perfecting less critical details like body position, streamlining, and roll. *Swim Speed Secrets* focuses on producing power—the most crucial element of swimming—to help triathletes and swimmers overhaul their swim stroke and find the speed that's been eluding them. With a commonsense approach that comes from decades of practice and years of hands-on coaching experience, Taormina shows swimmers how to transition to faster swimming. *Swim Speed Secrets* includes: The best drills to cultivate a more sensitive feel for the water Dryland and strength building exercises to develop arm position and upper body musculature Crisp photos of Olympic swimmers and variations in their high-elbow underwater pull Clear descriptions of the key moments of the underwater pull Tips that helped her perform at a world-class level for two decades Sheila Taormina's *Swim Speed Secrets* brings the focus back where it belongs—to a powerful underwater stroke. With this approach, triathletes and swimmers can stop swimming for survival and break through to new levels of speed and confidence in the water.

This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones

and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.

This book concentrates on the strategic role and importance of production / operations, enabling the firm to be competitive in global markets. The first chapter, on strategic issues, provides an important framework for the rest of the book. Human resource management and new product development are given chapters of their own, and the chapter on manufacturing strategy provides an exhaustive discussion of key areas. Endorsements "There is no single text that I can think of which is as soundly written on the subject as this one. The perspective is clearly based on 20/20 vision, the toolkit is knowledgeably and freshly laid out and the supporting evidence described by a person obviously and freshly laid out and the supporting evidence described by a person obviously master of his subject." Dr Tom Mullen, Strathclyde Graduate Business School, University of Strathclyde "A timely book which is a step ahead of competing texts by demanding proper consideration be given to production and human resource operations in the top planners' inner sanctum.
