The Day the Tall Man Got Lost Simon and Schuster

Welcome to a world where little people have big personalities. A world that's upside down and yet weirdly, wonderfully real. A world where Lilliputian thieves poach strawberry seeds. Where it takes a guy with a jackhammer to pop open pistachios. Where skaters fall into a crack in the crème brûlée, and teddy bear cookies congregate with evil intent. Marrying inspired photographs of real food and tiny people with equally inspired captions, photographer Christopher Boffoli creates a smart, funny, quirky vision of what it means to play with your food. The scenes are hilarious and outlandish—a farmer shovels a pasture full of cow pies, aka chocolate chips; hikers pause at a rest stop to take in a magical mushroom forest. And the captions surprise with their cleverness and emotional truth. Of the proudly gesticulating little chef amid the macarons: "Right on cue, Philippe stepped up to take all of the credit." Of the tiny bather up to her chin in waves of blue Jell-O: "In her continuing search for a husband, Gladys decided it was best to put herself in situations where she needed to be rescued." Of the broad-

shouldered technician spreading condiments on a hot dog: “Gary always uses too much mustard. But no one can say so. It’s a union thing.” Happiness, hope, adventure, pride, love, greed, menace, solitude—it’s our world, seen through a singularly unique and funny lens, in more than 100 scenes from breakfast through dessert.

Blue Planet Law is the global and future-oriented environmental law that is necessary to face the global environmental crisis in the Anthropocene, assuming especially the link between climate action (SDG 13) and ocean sustainability (SDG 14). This open access book focuses on means of overcoming global environmental problems such as climate change, ocean degradation and biodiversity loss and the consequent risks for human life, health, food and wellbeing. It explores how environmental law, at the international, European and national levels, might set economic and technological development on a more sustainable path. Law must engage in dialogue with other areas such as philosophy, economics, ecology, and biology. This book highlights protection of the climate and the oceans and sustainable use of natural resources, through new policies, economies and technologies, including biotechnology, with a view to the preservation of life, health, food and a healthy environment for the present and future generations. The book may be seen as a contribution to the UN Sustainable Development Goals 13 and 14 and a tribute to the Declaration of the United Nations Conference on the Human Environment, also known as the Stockholm Conference (1972), on its 50th Anniversary.

Little Blue Saves the World Little People, BIG DREAMS

Shocking, intimate, often uncomfortably honest, these stories reaffirm Doris Lessing's unequalled ability to capture the truth of the human condition In the title novel, two friends fall in love with each other's teenage sons, and these passions last for years, until the women end them, vowing a respectable old age. In *Victoria and the Staveney's*, a young woman gives birth to a child of mixed race and struggles with feelings of estrangement as her daughter gets drawn into a world of white privilege. *The Reason for It* traces the birth, faltering, and decline of an ancient culture, with enlightening modern resonances. *A Love Child* features a World War II soldier who believes he has fathered a love child during a fleeting wartime romance and cannot be convinced otherwise.

Lestrade panted, getting to his feet as the gang of Cheathams fell back. "Right now I can think of worse things than rescue by an amateur detective." "My dear Lestrade, we're simply ensuring the fight is fair." Sherlock Holmes somehow dissuaded the truth of that by the way his lips were coiling up at the edges (without letting go of the pipe in his teeth). Perhaps it was because he was clearly in disguise as a seedy deckhand in Dutchman's sailing clothes. From behind him the little professional could see Dr. Watson, tarred like a sailor and armed with a wicked-looking blackthorn. "Well, then!" Lestrade crowed with his fist up and parallel to the looming swarm over the tavern. "Who is next?" "Marcia Wilson has discovered Scotland Yard's Tin Dispatch Box."
