### Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen Beck/Hart/Nomos

The Farm in the Green Mountains is a story of a refugee family finding its true home—thousands of miles from its homeland. Alice and Carl Zuckmayer lived at the center of Weimar era Berlin. She was a former actor turned medical student, he was a playwright, and their circle of friends included Stefan Zweig, Alma Mahler, and Bertolt Brecht. But then the Nazis took over and Carl's most recent success, a play satirizing German militarism, impressed them in all the wrong ways. The couple and their two daughters were forced to flee, first to Austria, then to Switzerland, and finally to the United States. Los Angeles didn't suit them, neither did New York, but a chance stroll in the Vermont woods led them to Backwoods Farm and the eighteenth-century farmhouse where they would spend the next five years. In Europe, the Zuckmayers were accustomed to servants; in

Vermont, they found themselves building chicken coops, refereeing fights between fractious ducks, and caring for temperamental water pipes "like babies." But in spite of the endless work and the brutal, depressing winters, Alice found that in America she had at last discovered her "native land." This generous, surprising, and witty memoir, a best seller in postwar Germany, has all the charm of an unlikely romantic comedy. *The Optimist's Guide to Letting Go* John Wiley & Sons

Library design in the 21st century has one common theme: collaboration is at the heart of innovation. Designing modern libraries is a complex process involving many stakeholders and participants. Libraries of all types work with an almost limitless range of constituent groups for input, buy-in and successful implementation. Securing support for new library buildings and renovations of libraries engages many people: library clients, community members, faculty, funding agencies, donors, governing authorities, librarians, architects, interior designers and planners. Telling the right story and getting to the end game demand carefully crafted approaches, wide-ranging skills, a unified vision and productive teamwork. The IFLA Library Buildings and Equipment Section has selected the best papers

presented by award-winning architects and international thought leaders from the academic and public library sector at our recent satellite conferences and seminars: "Collaborative Strategies for Successful Library Design" (Chicago, Illinois), "What comes after the Third Place?" (Columbus, Ohio); "Key Issues for Library Space: International Perspectives" (Maynooth, Ireland); "Storage, the final frontier" (Munich, Germany) and "Telling and selling the space story" (Wrocław, Poland). The stories by the library and design professionals within this publication illustrate how powerful a role partnerships, outreach and cooperation play in a library project's success.

*European Preventive Restructuring* HarperCollins

The ninth installment of Bernard Cornwell's bestselling series chronicling the epic saga of the making of England, "like Game of Thrones, but real" (The Observer, London)—the basis for The Last Kingdom, the hit television series coming to Netflix in Fall 2016. A fragile peace reigns in Wessex, Mercia and East Anglia. King Alfred's son Edward and formidable daughter, Aethelflaed, rule the kingdoms. But all around the restless Northmen, eyeing the rich lands and wealthy churches, are mounting raids. Uhtred of Bebbanburg, the kingdoms' greatest warrior, controls northern Mercia from the strongly fortified city of Chester. But forces are gathering against him. Northmen allied to the Irish, led by the fierce warrior Ragnall Ivarson, are soon joined by the Northumbrians, and their strength could prove overwhelming. Despite the gathering threat, both Edward and Aethelflaed are reluctant to move out of the safety of their fortifications. But with Uhtred's own daughter married to Ivarson's brother, who can be trusted? In the struggle between family and loyalty, between personal ambition and political commitment, there will be no easy path. But a man with a warrior's courage may be able to find it. Such a man is Uhtred, and this may be his finest hour.

*Cognition and Tool Use* Beck/Hart

YOU'VE GOT THE KNOW-HOW - NOW GET THE DO-HOW!

Everybody knows that change can be difficult. Sometimes you feel yourself stuck going round in circles as you revisit the same challenges again and again. But there is a way to change things - and it doesn't have to be complicated. In this highly practical book, Dave Corbet and Ian Roberts show just how quickly you can move forward once you recognize that the key to change is not your know-how - understanding how to make change happen in theory - but your do-how - the shifts in behaviour that will deliver the changes you want, whether this be at home or work.

Dispensing with academic jargon, and illustrated throughout with real-life examples and case studies, the book draws together diverse aspects of change into one simple, tried-and-tested roadmap, allowing you to develop the do-how you need to achieve breakthrough change: change that sticks, and delivers results.

*Warriors of the Storm* Simon and Schuster

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline

of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

**Africa's Newest Nation** Harvard University Press

Curriculums for STEM education programs have been successfully implemented into numerous school systems for many years.

Recently, the integration of arts education into such programs has proven to be significantly beneficial to students, resulting in a new method of teaching including science, technology, engineering, art, and mathematics. *Cases on STEAM Education in Practice* is an essential research publication for the latest scholarly information on curriculum development, instructional design, and educational benefits of STEAM learning initiatives. Featuring coverage on a range of topics including fine arts, differentiated instruction, and student engagement, this book is ideally designed for academicians, researchers, and professionals seeking current research on the implementation of STEAM education.

**Business English for Beginners** Anne Schwartz Books

"This book aims to fill a gap in the process of confrontation between the disciplines, case laws and literature of the central EU member states. In particular it aims to address the difficulty of finding sources for scholars and professionals explaining the rules and guidelines of corporate law in the different European states. The main features of the discipline of Corporate Law in Germany, England, France, Italy, Spain, Poland, Romania and the Netherlands are illustrated. The objective of the work is not only to describe the main features of the discipline, but especially to highlight the most important critical profiles, and particularly those under the scrutiny of the case law and most studied (as problematic) by the doctrine."--Bloomsbury Publishing.

Mit der Berufsausbildung beginnt für die Auszubildenden ein neuer Lebensabschnitt. Dieser Ausbildungskompass hilft, die Ausbildung vom ersten Tag bis hin zur Abschlussprüfung erfolgreich zu meistern. Welche Formalitäten muss man zu Beginn der Ausbildung beachten? Welche Rechte und Pflichten hat man als Auszubildende/-r, welche Kenntnisse und Fertigkeiten muss man in diesem Ausbildungsberuf beherrschen? Was lernt man in der Ausbildungskanzlei, was in der Berufsschule? Wie wird das Berichtsheft geführt? Wie lernt man effektiv und erfolgreich? Wie bereitet man sich sinnvoll auf die Zwischen- und Abschlussprüfung vor? Welche Weiterbildungsmöglichkeiten gibt es nach der Ausbildung? Das Buch führt die Auszubildenden schnell und sicher durch den Dschungel der vielen Vorschriften und Regelungen, zeigt Lern- und Arbeitstechniken und dient der zielgenauen Vorbereitung auf die Prüfung. Ein praxisingerechter Leitfaden für alle Auszubildenden in Rechtsanwalts- und Notarkanzleien sowie für alle, die den Ausbildungsgang unterstützend begleiten.

Library Design for the 21st Century IGI Global

Three generations. Seven days. One big secret. The author of *The Coincidence of Coconut Cake* unfolds a mother-daughter story told by three women whose time to reckon with a life-altering secret is running out. Gina Zoberski wants to make it through one day without her fastidious mother, Lorraine, cataloguing all her faults, and her sullen teenage daughter, May, snubbing her. Too

bad there's no chance of that. Her relentlessly sunny disposition annoys them both, no matter how hard she tries. Instead, Gina finds order and comfort in obsessive list-making and her work at Grilled G's, the gourmet grilled cheese food truck built by her late husband. But when Lorraine suffers a sudden stroke, Gina stumbles upon a family secret Lorraine's kept hidden for forty years. In the face of her mother's failing health and her daughter's rebellion, this optimist might find that piecing together the truth is the push she needs to let go...

**Programm & Abstracts** Walter de Gruyter GmbH & Co KG  
The European Directive (Directive (EU) 2019/1023 of the European Parliament and of the Council of 20 June 2020 on preventive restructuring frameworks, on discharge of debts and disqualification, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt) has to be transposed into national legislation by 26 June 2021. The main features of the Directive are: - the obligatory making available of early warning systems; - the obligatory creation of an insolvency avoidance mechanism; - the determination of certain insolvency related officers' duties; - the uniformisation of discharge rules among member states; and - measures to increase the national insolvency laws' efficiency In this book a team of European-wide recognised, experienced insolvency law experts, some of whom had been involved in the drafting process of the Directive, analyse the Directive. The authors focus not only on the officials tasked in the national surroundings with drafting the national statutes but also on the wider implications which, one way or the other, will be national law. The commentary, thus, serves also the purposes of practitioners and judges in the field of restructuring.

eIDAS-Regulation Beck/Hart

In this intriguing study, Jacques Le Goff, one of the most esteemed contemporary French historians of the Middle Ages, presents a concise investigation of the problem that usury posed for the medieval Church, which had long condemned the lending of money for interest.

**Experiments in Ethics** Addison-Wesley Longman

The ability to use tools is a distinguishing feature of human beings. It represents a complex psychomotor activity that we are only now beginning to comprehend. Robust new theoretical accounts allow us to better understand how people use tools and explain differences in human and animal tool use from the perspective of cognitive science. Our understanding needs to be grounded upon research into how people use tools, which draws upon many disciplines, from ergonomics to anthropology to cognitive science to neuropsychology. *Cognition and Tool Use: Forms of Engagement in Human and Animal Use of Tools* presents a single coherent account of human tool use as a complex psychomotor activity. It explains how people use tools

and how this activity can succeed or fail, then describes the design and development of usable tools. This book considers contemporary tool use in domains such as surgery, and considers future developments in human-computer interfaces, such as haptic virtual reality and tangible user interfaces. No other single text brings together the research from the different disciplines, ranging from archaeology and anthropology to psychology and ergonomics, which contribute to this topic. Graduate students, professionals, and researchers will find this guide to be invaluable.

Fachbezogene Informationsverarbeitung Ardis

The World Justice Project (WJP) joins efforts to produce reliable data on rule of law through the WJP Rule of Law Index 2016, the sixth report in an annual series, which measures rule of law based on the experiences and perceptions of the general public and in-country experts worldwide. We hope this annual publication, anchored in actual experiences, will help identify strengths and weaknesses in each country under review and encourage policy choices that strengthen the rule of law. The WJP Rule of Law Index 2016 presents a portrait of the rule of law in each country by providing scores and rankings organized around eight factors: constraints on government powers, absence of corruption, open government, fundamental rights, order and security, regulatory enforcement, civil justice, and criminal justice. A ninth factor, informal justice, is measured but not included in aggregated scores and rankings. These factors are intended to reflect how people experience rule of law in everyday life. The country scores and rankings for the WJP Rule of Law Index 2016 are derived from more than 110,000 households and 2,700 expert surveys in 113 countries and jurisdictions. The Index is the world's most comprehensive data set of its kind and the only to rely solely on primary data, measuring a nation's adherence to the rule of law from the perspective of how ordinary people experience it. These features make the Index a powerful tool that can help identify strengths and weaknesses in each country, and help to inform policy debates, both within and across countries, that advance the rule of law.

Der Band stellt die Aufgaben und Aktivitäten der Organisation für Sicherheit und Zusammenarbeit in Europa von der Konfliktverhütung und Krisenbewältigung über die Förderung von Demokratie und Menschenrechten bis zu regionaler Rüstungskontrolle dar - wissenschaftliche Analysen und Berichte aus der politischen und diplomatischen Praxis.

Company Laws of the EU Springer-Verlag

This work provides lawyers with more than 100 legal interpretation figures that are used by lawyers worldwide to justify their legal decisions. The book puts lawyers in a position, to develop - step by step - a solution for a hitherto unsolved legal

problem in such a way that it convinces the opposing party of the content of his/her solution. The book covers - legal sources - classic and modern figures of interpretation - the challenging concretisation and construction of law - influence of the constitution and European law as a higher-ranking law - determination of the limits of permissible further development of the law - and, very relevant for practice, the hermeneutics of facts. The book benefits from a combination of classic and modern methodology, a lively presentation with numerous examples from literature and jurisprudence and coverage of several cases for in-depth reflection. The work will be a significant tool for all those interested in the basics of law.

Interactive Computer Graphics is the only introduction to computer graphics text for undergraduates that fully integrates OpenGL® and emphasizes application-based programming. Graphics Systems and Models; Graphics Programming; Input and Interaction; Geometric Objects and Transformations; Viewing; Shading; From Vertices to Fragments; Discrete Techniques; Programmable Shaders; Modeling; Curves and Surfaces;

Advanced Rendering; Sample Programs; Spaces; Matrices; Synopsis of OpenGL Functions. MARKET: For all readers interested in computer animation and graphics using OpenGL®. From Know-How to Do-How Boynton/Cook

This new handbook takes an innovative look at the current and potential effects of big data and artificial intelligence on the legal system. It explains how technological advances in data collection and information processing will make it possible to change the design of legal rules and tailor them to specific individuals. This new type of “granular legal norms” is part of a broader trend towards algorithmic regulation in the emerging data economy. With practical examples from contract, consumer and tort law, leading experts from Canada, Europe, Israel, and the United States explain how and to what extent legal norms could be personalised. They explore the advantages, limitations and potential dangers of legal micro-targeting and explain how the personalisation of legal norms could change the relationship between individuality, privacy and the protection of general interests. This handbook offers a multi-faceted overview of the emerging field of “personalised law” and provides a unique source of inspiration for scholars, lawyers, judges and lawmakers.
