*Pop Culture Germany!* Phaidon Press  
This lucid and comprehensive collection of essays by an international group of scholars constitutes a photo-historical survey of select photographers who embraced National Socialism during the Third Reich. These photographers developed and implemented physiognomic and ethnographic

photography, and, through a Selbstgleichschaltung (a self-co-ordination with the regime), continued to practice as photographers throughout the twelve years of the Third Reich. The volume explores, through photographic reproductions and accompanying analysis, diverse aspects of photography during the Third Reich, ranging from the influence of Modernism, the qualitative effect of propaganda photography, and the utilisation of technology such as colour film, to the photograph as

ideological metaphor. With an emphasis on the idealised representation of the German body and the role of physiognomy within this representation, the book examines how select photographers created and developed a visual myth of the 'master race' and its antitheses under the auspices of the Nationalist Socialist state. Photography in the Third Reich approaches its historical source photographs as material culture, examining their production, construction and proliferation. This detailed and informative text will be a valuable resource not only to historians studying the Third Reich, but to scholars and students of film, history of art, politics, media studies, cultural studies and holocaust studies.

New Views is a unique and beautiful collection of fifty maps in which our physical, political and cultural world is

visualised, measured and mapped like never before. Alastair Bonnett's expert text provides vivid insight on each topic. From charting energy networks to revealing new and emerging lands, measuring human migration to assessing the planet's ant populations – and including the phenomena we have little control over such as lightning strikes or asteroid impact – each map asks you to question, wonder and look again at our rapidly changing and often surprising world. Divided into three thematic sections: Land, Air and Sea; Human and Animal, and Globalisation, New Views offers a fresh and truly global portrait of our intricately fascinating planet.

- The ultimate insider's guide to Berlin, revised and updated for 2019- Features interesting and unusual places not found in traditional travel guides In Berlin, the city divided after World War II, everybody knows about the Brandenburg Gate, Hitler's bunker, Kennedy's speech, red and green beer, splendidly broad boulevards, and numerous lakes. But this metropolis, once again the capital of Germany, encompasses many clandestine niches characteristic of a heterogeneous city without a beginning and without an end between its famous backyards, nature parks, and bridges. It is often these miniscule witnesses that tell authentic history. Besides the larger attractions, this unusual guide presents Berlin's other side - such as a tower so ugly that

no-one wants to open a restaurant in it; a library offering its books in the trunks of living trees; the monument for the inventor of the currywurst; a residential settlement in a former East German prison; the place where the Nazis concealed the so-called "degenerate art" which they had confiscated; the house where David Bowie lived; an automat out of which maggots can be pulled; a museum for things used for purposes for which they were not created; the reception camp for refugees from East Germany - and, in a completely unexpected spot, the most romantic place in Berlin.

"Not to be missed!" —Marissa Meyer, #1 New York Times bestselling author of *The Lunar Chronicles* "An explosion of emotion, intrigue, romance, and revolution." —Stephanie Garber, #1 New York Times bestselling author of the *Caraval* series In the tradition of *The Lunar Chronicles*, this sweeping reimaging of *Les Misérables* tells the story of three teens from very different backgrounds who are thrown together amidst the looming threat of revolution on the French planet of Laterre. A thief. An officer. A guardian. Three strangers, one shared destiny... When the Last Days came, the planet of Laterre

promised hope. A new life for a wealthy French family and their descendants. But five hundred years later, it's now a place where an extravagant elite class reigns supreme; where the clouds hide the stars and the poor starve in the streets; where a rebel group, long thought dead, is resurfacing. Whispers of revolution have begun—a revolution that hinges on three unlikely heroes... Chatine is a street-savvy thief who will do anything to escape the brutal Regime, including spy on Marcellus, the grandson of the most powerful man on the planet. Marcellus is an officer—and the son of an infamous traitor. In training to take command of the military, Marcellus begins to doubt the government he's vowed to serve when his father dies and leaves behind a cryptic message that

only one person can read: a girl named Alouette. Alouette is living in an underground refuge, where she guards and protects the last surviving library on the planet. But a shocking murder will bring Alouette to the surface for the first time in twelve years...and plunge Laterre into chaos. All three have a role to play in a dangerous game of revolution—and together they will shape the future of a planet.

*Histories of Leisure* Eerdmans Books For Young Readers  
 In the wake of the American and French revolutions, European culture saw the evolution of a new leisure regime never previously enjoyed. Now we speak of modern leisure societies, but the history of leisure, its experiences and expectations, its scope and variability, still remains largely a matter of conjecture. One message that has emerged from a multiplicity of disciplines is that research on leisure and consumption opens up a hitherto untapped mine of information on the broader issues of politics, society,

culture and economics. How have leisure regimes in Europe evolved since the eighteenth century? Why has leisure culture crystallized around particular practices, sites and objects? Above all, what sorts of connections and meanings have been inscribed in leisure practices, and how might these be compared across time and space? This book is the first to provide an historical overview of modern leisure in a wide range of manifestations: travel, entertainment, sports, fashion, 'taste' and much more. It will be essential reading for anyone wishing to know more about European history and culture or simply how people spent their free time before the age of television and the internet.

Altyn-Depe Chronicle Books

History is everywhere, and is never as complete as when it can be accessed on a part of history itself. The locomotive is one of the great steps in progress of civilisation that undoubtably connects us to land and history that was shaped by the machine itself. Although a basic form of railway, or rutway, did exist in Ancient Greek and Roman times – notably the

ship trackway between Diolkos and the Isthmus of Corinth around 600 BC – it would take several thousand years before the first fare-paying passenger service was launched in the early nineteenth century. Some two hundred years on, it is possible to travel by train to some of the world's most remote and remarkable destinations, and track the many wonderful legacies of the Earth's extensive history – man-made and otherwise. From prehistoric rock formations to skyscraper cities, slow steam engines to high-speed bullet trains, let *A History of the World in 500 Railway Journeys* be your guide. Through its beautifully illustrated pages, and 500 awe-inspiring railway journeys, you can chart your own transcontinental itinerary through time. Chug through canyons,

steam past ancient monuments, speed through cities, luxuriate in the railcars of presidents and queens, or make express connections between key historical moments or epic eras, *A History of the World in 500 Railway Journeys* has it all. A must-read for travellers, railfans and history buffs alike, offering inspiration and information in equal measure.

New islands are under construction or emerging because of climate change. Eccentric enclaves and fantastic utopian experiments are multiplying. Once-secret fantasy gardens are cracking open their doors to outsiders. Our world is becoming stranger by the day—and Alastair Bonnett observes and captures every fascinating change. In *Beyond the Map*, Bonnett presents stories of the world's most extraordinary spaces—many unmarked on any official map—all of which challenge our assumptions about what we know—or think we know—about our world. As cultural, religious and political boundaries ebb and flow with each

passing day, traditional maps unravel and fragment. With the same adventurous spirit he effused in the acclaimed *Unruly Places*, Bonnett takes us to thirty-nine incredible spots around the globe to explore these changing boundaries and stimulate our geographical imagination. Some are tied to disruptive contemporary political turbulence, such as the rise of ISIL, Russia's incursions into Ukraine and the Brexit vote in the United Kingdom. Others explore the secret places not shown on Google Earth or reflect fast-changing landscapes. Beyond the Map journeys out into a world of mysterious, daunting and magical spaces. It is a world of hidden cultures and ghostly memories, of uncountable new islands and curious stabs at paradise. From the

phantom tunnels of the Tokyo subway to a stunning movie-set re-creation of 1950s-era Moscow; from the caliphate of the Islamic State to virtual cybertopias—this book serves as an imaginative guide to the farthest fringes of geography.

*The Golden Atlas* Lannoo Meulenhoff - Belgium

A lovely small-trim edition of the award-winning *Atlas of Remote Islands* The *Atlas of Remote Islands*, Judith Schalansky's beautiful and deeply personal account of the islands that have held a place in her heart throughout her lifelong love of cartography, has captured the imaginations of readers everywhere. Using historic events and scientific reports as a springboard, she creates a

story around each island: fantastical, inscrutable stories, mixtures of fact and imagination that produce worlds for the reader to explore. Gorgeously illustrated and with new, vibrant colors for the Pocket edition, the atlas shows all fifty islands on the same scale, in order of the oceans they are found. Schalansky lures us to fifty remote destinations—from Tristan da Cunha to Clipperton Atoll, from Christmas Island to Easter Island—and proves that the most adventurous journeys still take place in the mind, with one finger pointing at a map.
