Thomas Kjos. Best, you
can implement these
training principles at
your own pace and as

your schedule allows. You will also enjoy:

Old Country Inns of England Stackpole Books

When the complexities of modern living demanded that, for his own protection as well as his master's convenience, the dog be made controllable, the average owner sought advice from the most available source, which was, too often, some local dog-show exhibitor. Not realizing that, excepting a few praiseworthy individuals, these exhibitors were only superficially concerned

with the qualities of use and companionship, an unfortunate dog owner would accept the sight of trophies or ribbons as the credits of an expert. Growing numbers of people and dogs continued to emphasize the advantages of proper dog-behavior and when, in 1935, The American Kennel Club instituted its obedience trials, the competition necessary to focus attention on results and improvement of methods was provided. And something else was observed. It was evident that thorough obedience training does more than assure a dog's response to his master's command; capacities for learning and emotional stability could be increased and integrated as

permanent qualities of character. Recently, leading magazines of both general and specialized nature have made the public aware of the trained dog's potential, and of the recreational possibilities of dog training as a hobby. Interest in dog-training classes and other activities where dogs are dignified by usefulness, rather than merely looked at, is evidence that the dog-training public has outgrown the "make a game" and "tid-bit tossing" techniques that, by not being founded on positive and proper motivations, demonstrate the inadequacy of the master, thus promoting failure of response at those times when control is most needed,

as well as contributing to the dog's feeling of insecurity. Dog owners of perspective have come to want the type of obedience upon which a blind person might stake his life, and the emotional stability that is vital to dogs in the presence of small, unpredictable children. Training the Best Dog Ever, originally

published in hardcover

as The Love That Dog

Training Program, is a

book based on love

and kindness. It

features a program of

positive reinforcement

and no-fail techniques

that author Dawn

Sylvia-Stasiewicz used

to train the White

House dog, Bo Obama,

and each of Senator

Ted Kennedy's dogs,

among countless

others. Training the

Best Dog Ever relies on

trust and treats, not

choke collars; on

bonding, not leash-

yanking or

reprimanding. The five-

week training program

takes only 10 to 20

minutes of practice a

day and works both for

puppies and for adult

dogs that need to be trained out of bad habits. Illustrated with step-by-step photographs, the book covers hand-feeding; crate and potty training; and basic cues—sit, stay, come here—as well as more complex goals, such as bite inhibition and water safety. It shows how to avoid or correct typical behavior problems, including jumping, barking, and leash-pulling. Plus: how to make your dog comfortable in the world—a dog that knows how to behave in a vet’s office, is at ease around strangers, and more. In other words, the best dog ever.

A director reveals the original inspirations for his films, their history, his methods of work, and the problems of visual creativity

Total Recall Dogwise Publishing

In 2006, about 69 million U.S. households had pets, giving homes to around 73.9 million dogs, 90.5 million cats, and 16.6 million birds, and spending more than 38 billion dollars

on companion animals. As never before in history, our pets are truly members of the family. But the notion of “companion species”—knotted from human beings, animals and other organisms, landscapes, and technologies—includes much more than “companion animals.”

In *When Species Meet*, Donna J. Haraway digs into this larger phenomenon to contemplate the interactions of humans with many kinds of critters, especially with those called domestic. At the heart of the book are her experiences in agility training with her dogs Cayenne and Roland, but Haraway's vision here also encompasses wolves, chickens, cats, baboons, sheep, microorganisms, and

whales wearing video cameras. From designer pets to lab animals to trained therapy dogs, she deftly explores philosophical, cultural, and biological aspects of animal-human encounters. In this deeply personal yet intellectually groundbreaking work, Haraway develops the idea of companion species, those who meet and break bread together but not without some indigestion. "A great deal is at stake in such meetings," she writes, "and outcomes are not guaranteed. There is no assured happy or unhappy ending—socially, ecologically, or scientifically. There is only the chance for getting on together with some grace." Ultimately, she finds

that respect, curiosity, and knowledge spring from animal-human associations and work powerfully against ideas about human exceptionalism. Tom Dokken's *Advanced Retriever Training* Good Press Written to coincide with a large-scale 60 Minutes feature, an insider's account of the world of elite Navy SEAL military canines traces the author's international search for eligible dog combat unit candidates with whom SEAL handlers eventually forged close bonds and saved countless lives. *Absolutely Positively Gundog Training* Wilderness Adventures Press In a new addition to the Richard A. Wolters series, a master dog trainer shares his

innovative, up-to-date techniques of training dogs for hunting, introducing six key tests for selecting the right puppy in a litter, the essentials of obedience training, how to use the electronic collar, tips on the fine art of retrieval, and drills for advanced dogs. 12,500 first printing.
